

## The History of Godlove Enterprises, Inc.

Perry Godlove started the septic system maintenance business on April 1, 1969 with one truck out of his shop at his farm in Idaville, IN, with his wife, Louise managing the office and serving the White county area. In over thirty-five years of business they have seen many changes. The business had grown by 1992 and moved to the present location at 933 Hanawalt Rd, Monticello, IN with a total of 3 employees and 2 septic tank pumper trucks. Chem-A-Lab water testing was added to the company. In the winter of 1995 came the Roto-Rooter sewer drain franchise and 1998 a terralift machine, now totaling 11 employees (four of which are family members) and serving 6 counties, White, Carroll, Jasper, Newton, and Benton along with Greater Lafayette and West Lafayette as well as some surrounding communities.
